West Customer Service

Westlaw Technical and Search Assistance (available 24 hours a day)

If you have general or technical questions about Westlaw, call West Customer Technical Support at 1-800-WESTLAW (1-800-937-8529) or send an e-mail message to west.support@thomson.com.

If you have search questions about Westlaw, call the West Reference Attorneys at 1-800-REF-ATTY (1-800-733-2889) or send an e-mail message to west.referenceattorneys@thomson.com.

Technical and search assistance is also available online at help.west.thomson.com.

Law students with general, technical, or search questions about Westlaw can call 1-800-850-WEST (1-800-850-9378).

Accessibility Support

For information on West's accessibility policy, go to west.thomson.com/accessibility.

Billing and Account Assistance

For billing and account assistance, call 1-800-328-4880.

Billing and account assistance is also available online at west.thomson.com/support.

Westlaw Training

For information about Web-based training, telephone training, or in-person training, visit west.thomson.com/westlaw/training.

Reference Materials

For free reference materials, visit west.thomson.com/westlaw/guides. Westlaw and other West products also contain valuable online Help.

About This Guide

In this guide, the graphics and step-by-step instructions are based on accessing Westlaw via the Internet. Because of the evolving nature of Internet technology, there may be recent changes to the Westlaw interface and functionality that are not reflected in this documentation.

Information in this guide is current through November 15, 2009.

1 Introduction

NewsRoom sources on Westlaw provide access to a comprehensive library of newspapers; business, financial, and trade publications; newswires; television and radio transcripts; and consumer magazines. Thousands of well-known and respected sources are available, including the *New York Times*, *Orlando Sentinel*, *Chicago Tribune*, *Los Angeles Times*, and *USA Today*. For a complete list of news and business sources on Westlaw, click **Directory** at the top of any Westlaw page.

Selecting the News, Company Information, and Public Records Page

When you access Westlaw, you can select a tabbed page that is customized for news research. The tabbed News, Company Information, and Public Records page places resources and search options within easy reach to help you quickly access the materials you need. To add the News, Company Information, and Public Records page, follow these steps:

1. Click **Add a Tab** at the top of any page. At the next page, click **Add Westlaw Tabs** to display a list of available tabbed pages.
2. Select the check box next to *News, Co Info, and Public Records* under *Business and News Information* and then click **Add to My Tab Set**.
3. A list of the pages you've selected is displayed under *In Tab Display*. One page is designated as your default page (the page that is displayed when you sign on to Westlaw). Click **Set as Default** next to *News, Co Info, and Public Records* to set this page as your default.
4. To display the News, Company Information, and Public Records page, click its tab (Figure 1).

Figure 1. News, Company Information, and Public Records page

News, Company Information, and Public Records Page Overview

The left frame provides quick access to important information, such as daily headlines from the *New York Times* and information about companies and people. For example, use the Companies in the Headlines feature to quickly retrieve recent articles discussing a particular company. Type the name of the organization (e.g., **international red cross**) in the text box and click **Go**. Westlaw automatically formulates a field-restricted query and runs it in the All News database (ALLNEWS).

The right frame consolidates business and news sources and allows you to quickly access a database and run a search. For example, click **Major Newspapers** under *News Sources* to access the Major Newspapers database (NPMJ) and display its Search page (Figure 2).

The screenshot displays the 'Search' interface for the 'Major Newspapers (NPMJ)' database. At the top, there are links for 'Change Database(s)', 'Notices', and 'Tips'. Below this, the 'Terms and Connectors' section offers 'Natural Language' and 'Template' options. A search input field is present, along with a 'Recent Searches & Locates' dropdown. To the right of the search field are links for 'Search Westlaw', 'Thesaurus', 'Term Frequency', 'Case-sensitive Searching', and 'Word Count Search'. Below the search field, there are dropdown menus for 'Dates' (set to 'Last 3 Years') and 'Fields' (set to 'Select an Option'). Two checkboxes are visible: 'Search only the headlines and lead paragraphs' and 'Identify duplicate documents'. The 'Limit Your Search using SmartTerms' section has tabs for 'Industry', 'Company', 'Subject', and 'Location'. The 'Industry' tab is selected, showing a list of industries with checkboxes and a 'Scan Results' area. The industries listed are: Accounting, Consulting & Legal Services; Advertising & Public Relations; Aerospace & Defense; Agriculture, Food & Beverage; Automotive; Business Services; Chemicals; and Construction. There are '>>' and '<<' buttons next to the list.

Figure 2. Major Newspapers Search page

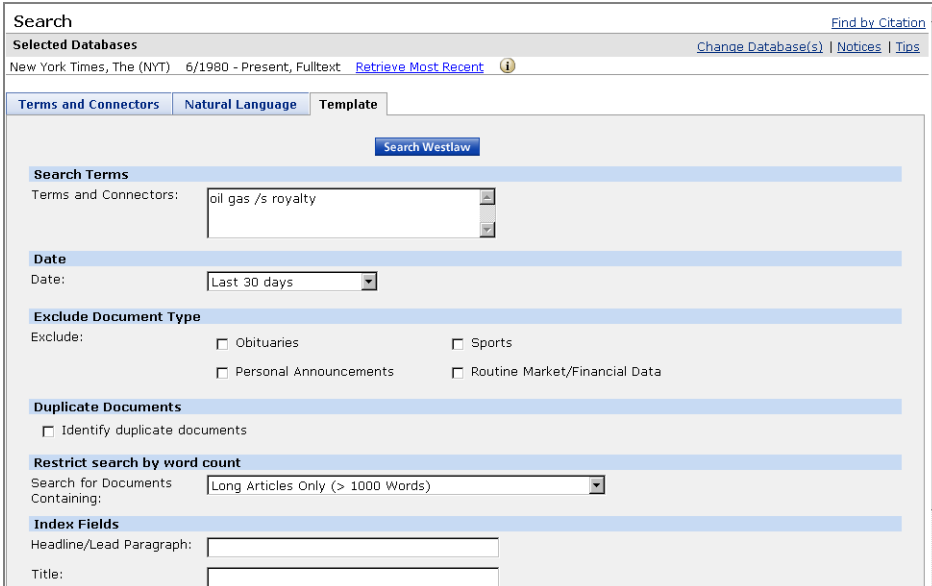

2 Searching NewsRoom Databases

Searching with a Template

You can search NewsRoom databases using either the Natural Language search method or the Terms and Connectors search method. You can also search some NewsRoom databases using a search template. Search templates contain fill-in-the-blank text boxes, drop-down lists, and check boxes to help you retrieve the information you want.

For example, to search for long articles from the *New York Times* that mention oil or gas royalties, complete these steps:

1. Access the New York Times database (NYT). The Search page is displayed.
2. Click the **Template** tab to display the search template (Figure 3).
3. Type **oil gas /s royalty** in the *Terms and Connectors* text box.
4. Choose a date range from the *Date* drop-down list, e.g., **Last 30 days**, if desired.
5. Choose **Long Articles Only (>1000 Words)** from the *Search for Documents Containing* drop-down list under *Restrict search by word count*.
6. Click **Search Westlaw**.

The screenshot shows the Westlaw search interface for the New York Times database. The page is titled "Search" and includes a "Find by Citation" link. The "Selected Databases" section shows "New York Times, The (NYT) 6/1980 - Present, Fulltext" with a "Retrieve Most Recent" button. The "Terms and Connectors" tab is selected, and the "Template" sub-tab is active. A "Search Westlaw" button is visible. The "Search Terms" section has a text box containing "oil gas /s royalty". The "Date" section has a dropdown menu set to "Last 30 days". The "Exclude Document Type" section has four checkboxes: "Obituaries", "Sports", "Personal Announcements", and "Routine Market/Financial Data", all of which are unchecked. The "Duplicate Documents" section has an unchecked checkbox for "Identify duplicate documents". The "Restrict search by word count" section has a dropdown menu set to "Long Articles Only (> 1000 Words)". The "Index Fields" section has two empty text boxes for "Headline/Lead Paragraph:" and "Title:".

Figure 3. Search template

For information on searching with Terms and Connectors and Natural Language, see the *Westlaw User Guide* available at west.thomson.com/westlaw/guides. For information on adding SmartTerms to your Terms and Connectors search, see "Using NewsRoom SmartTerms" on page 6.

Database Search Page Options

When you search a NewsRoom database using the Terms and Connectors search method, you can use a number of features at the database Search page to help you search efficiently.

TERM FREQUENCY

Click **Term Frequency** after you type a query to specify the minimum number of times that a term must appear in the retrieved documents. This feature is helpful when you are searching using a common term or one that is used in a variety of contexts.

CASE-SENSITIVE SEARCHING

Click **Case-sensitive Searching** after you type a query to specify capitalization requirements for the search terms in your retrieved documents. You can specify that a term have

- all letters in uppercase format (e.g., U.N.)
- at least one letter in uppercase format (e.g., Chase)
- all letters in lowercase format (e.g., explorer)

WORD COUNT SEARCH

Click **Word Count Search** to specify the length of the documents in your result. You can specify that your result include

- short articles/abstracts only (<200 words)
- no short articles/abstracts (>200 words)
- medium length articles only (>200 words, <1000 words)
- long articles only (>1000 words)

SEARCH ONLY THE HEADLINES AND LEAD PARAGRAPHS

You can restrict your search to only the headline and lead paragraphs of a news article by selecting the **Search only the headlines and lead paragraphs** check box.

FIELDS DROP-DOWN LIST

Choose a field from the *Fields* drop-down list to automatically add the abbreviation for this field to the *Search* text box. Type the terms you want included in the field restriction in the parentheses following the abbreviation.

IDENTIFY DUPLICATE DOCUMENTS

Because different news sources often base their reports on the same events, searches of news sources may retrieve many documents containing similar information. Select the **Identify duplicate documents** check box to identify documents containing substantially similar information published within a six-week period. Duplicate documents are listed below the primary document in the result list.

More Like This and More Like Selected Text

When your search is complete, a result list is displayed. To view a document in the list, click its title. When you are viewing the full text of a document on Westlaw, you can click **More Like This** or **More Like Selected Text** to retrieve a list of additional documents that discuss similar concepts.

When you use the More Like This or More Like Selected Text feature, Westlaw automatically runs a search for you. A More Like This search result is based on statistically significant terms in the document you are viewing. A More Like Selected Text search result is based on the document text you select (Figure 4).

You can edit the search that Westlaw runs to retrieve your More Like This or More Like Selected Text result. To do this, you will need to change your Westlaw preferences. Click **Preferences** at the top of any page, and then click **Search** in the left frame. At the Search Preferences page, select the **Edit More Like This Searches** check box, the **Edit More Like Selected Text Searches** check box, or both check boxes. Then click **Save Changes** at the bottom of the page.

After you change your preferences to allow editing of More Like This and More Like Selected Text searches, a search page is displayed when you click **More Like This** or **More Like Selected Text** (Figure 5). Use the check boxes to select key terms, and type additional terms, if desired, in the *Additional Key Terms* text box. To specify a date restriction, click **Add Date Restriction**.

The image shows a document page from NewsRoom with a search panel overlaid. The document title is "11/11/09 NYT A16" and the date is "November 11, 2009". The document text includes "U.S. Tries to Salvage Honduras Agreement" and "GINGER THOMPSON". A search panel titled "More Like Selected Text" is overlaid on the right side of the page. The panel shows "Selected Databases" as "New York Times, The (NYT) 6/1980 - Present, Fulltext". The "Key Terms" section contains a grid of checkboxes for various terms, with several checked. The "Additional Key Terms" section has an empty text box. The "Add Date Restriction" button is also visible.

U.S. Tries to Salvage Honduras Agreement

GINGER THOMPSON

WASHINGTON Under fire from allies in Latin America and on Capitol Hill, the Obama administration moved Tuesday to try to salvage the American-brokered agreement that had been billed as the way for a peaceful end to the coup in Honduras. Instead, the accord seems to have put the country's de facto government with a way to stay in power until a presidential election scheduled for the end of this month.

The State Department sent Deputy Assistant Secretary of State Craig Kelly to Honduras on Tuesday for meetings with Manuel Zelaya, who was ousted from power as president more than two months ago, and with the head of the de facto government, Roberto Micheletti.

3 Using NewsRoom SmartTerms

What Are SmartTerms?

To help you quickly retrieve relevant information, documents in NewsRoom sources are assigned index reference codes called *SmartTerms*. SmartTerms help you refine your search and retrieve only those documents that contain the type of information you specify. Using these predefined terms saves you searching and browsing time on Westlaw and makes your online searches more efficient.

SmartTerms are different from Smart Tools. Smart Tools refers to a suite of automatic search enhancements on Westlaw that identifies misspellings in your Terms and Connectors query (Did You Mean) and identifies terms related to those in your query (Add Related Terms). When searching NewsRoom databases, you can use both smart technologies.

Industry, News-Subject, and Geographic SmartTerms

The classification system for SmartTerms is based on editorially developed categories. Industry, news-subject, and geographic SmartTerms are assigned to a NewsRoom document if the document matches the concept that the term represents.

- Text in a NewsRoom document is compared to sophisticated classification models created and maintained for each of the SmartTerm categories by editorial teams. These proprietary models are periodically enhanced to reflect changing terminology and user searching patterns.
- If a document matches the model for a specific SmartTerm, the term is added to the appropriate index field for that term—industry (ind), news-subject (ns), or geographic (geo). Thus, when you search for a specific SmartTerm in the appropriate index field, you retrieve documents containing the same concept that the term represents.

Note that a SmartTerm represents a general concept of what a document is about. The term does not need to actually appear in a document to retrieve the document. For example, a news article in *Fortune* magazine may discuss the commercial release of a newly developed medical device without actually mentioning the terms *medical* or *device*. Nevertheless, the article is assigned the industry SmartTerm *Medical Devices*, and you will retrieve it if you include the SmartTerm or its code (1ME31) in your search.

Conversely, even though a term appears in the text of a document, it may not be used as a SmartTerm in the index field if the model determines that the document is not about the subject represented by the term.

This guide lists the terms for industry, news-subject, and geographic SmartTerms and their corresponding West index codes in the appendix. To search using these codes, type the field abbreviation followed by the code in parentheses. For example, in any NewsRoom database, you can type **ind(1te66)** in the *Search* text box to retrieve documents about television ratings (Figure 6). Searching with the index codes is available only with the Terms and Connectors search method. For further information on searching with SmartTerms, see “Using SmartTerms in Your Terms and Connectors Queries” on page 11.

Alternatively, you can use the Limit Your Search Using SmartTerms feature to add SmartTerms to your search without typing them (Figure 6). For mor information on using this feature see “Using the Limit Your Search Using SmartTerms Feature” on page 9.

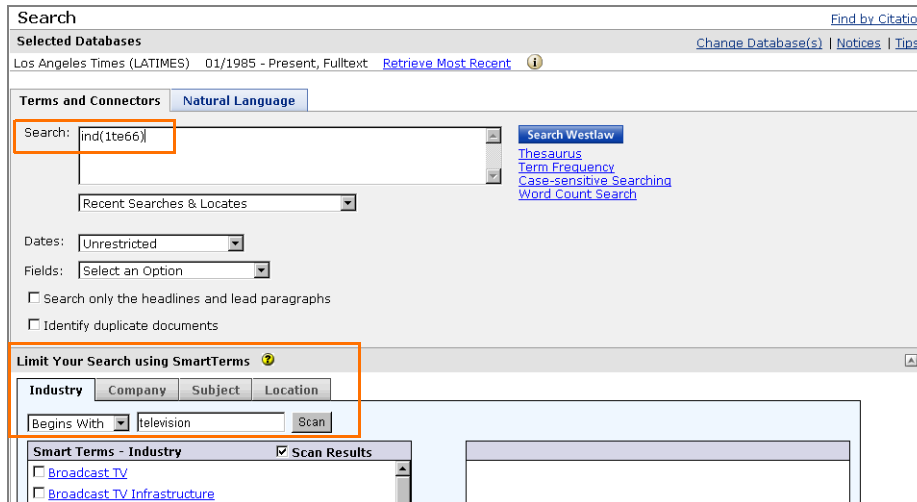

Figure 6. Searching with SmartTerms

Company SmartTerms

Company names are added to the company field (com) in NewsRoom documents in a manner different from that used for industry, news-subject, and geographic SmartTerms.

Potential company names are extracted from NewsRoom documents using a sophisticated automated routine that employs a variety of techniques to identify a name and determine if it is likely to be a company name. These extracted names are matched against the Company Authority File to confirm that the name is indeed a company name and to determine the preferred or official form of the name. For example, the name *Big Blue* may be extracted from a document and matched to *International Business Machines Corp* in the Company Authority File as the preferred name. The preferred name is added to the list of SmartTerms that are searchable in the company field of NewsRoom documents.

Note that company SmartTerms differ from industry, news-subject, and geographic SmartTerms. Company SmartTerms do not determine if a document is about a company; they determine only that a company is mentioned in a document and provide a standard search term that can be used to search all NewsRoom databases.

The Company Authority File is the key to this process. The file contains a list of variant names for a company and its preferred name, as well as additional information, such as a company's ticker symbol (which can also be used as a search term in NewsRoom documents). The Company Authority File is constantly updated by editors from several Thomson companies to include additional companies, more variants, and additional information about companies.

This guide does not list company SmartTerms. To search for company-specific NewsRoom documents, you can use the common name of a company (e.g., **com("general mills")**) or its ticker symbol (e.g., **com(gis)**). You can also use the Limit Your Search Using SmartTerms feature to search for company information using its common name, ticker symbol, or Standard Industrial Classification (SIC) code (Figure 7).

The screenshot displays the Thomson Financial News search interface. At the top, the 'Selected Databases' section shows 'Thomson Financial News (THOMSONFIN)' with links for 'Retrieve Most Recent', 'Change Database(s)', 'Notices', and 'Tips'. Below this, the 'Terms and Connectors' section is active, with a search box containing 'com("general mills")'. To the right of the search box are links for 'Search Westlaw', 'Thesaurus', 'Term Frequency', 'Case-sensitive Searching', and 'Word Count Search'. Below the search box is a 'Recent Searches & Locates' dropdown menu. Further down, there are 'Dates' (set to 'Last 90 Days') and 'Fields' (set to 'Select an Option') dropdown menus. Two checkboxes are present: 'Search only the headlines and lead paragraphs' and 'Identify duplicate documents'. The 'Limit Your Search using SmartTerms' section is highlighted with an orange box. It features tabs for 'Industry', 'Company', 'Subject', and 'Location'. Below these tabs is an 'Exact Phrase' dropdown menu set to 'gis' and a 'Scan' button. Underneath, the 'Search By' section has radio buttons for 'Name', 'Ticker', and 'SIC'. The 'Smart Terms - Company' section is also highlighted with an orange box and shows a checkbox for 'GENERAL MILLS INC' and a 'Scan Results' button.

Figure 7. Searching with company SmartTerms

Searching with SmartTerms

USING THE LIMIT YOUR SEARCH USING SMARTTERMS FEATURE

The Limit Your Search Using SmartTerms feature makes it easy to create a focused query and retrieve relevant documents. Access any NewsRoom database, such as ALLNEWS (Figure 8), and follow these steps:

1. Click the **Terms and Connectors** tab if it is not already selected.
2. Under *Limit Your Search using SmartTerms*, click **Industry**, **Company**, **Subject**, or **Location**. Then do one of the following:
 - Choose **Begins With**, **Contains**, or **Exact Phrase** from the drop-down list and type a search term in the text box. Then click **Scan**. Select the check box next to the term and click the right arrow button to add it to your search.
 - Click the plus (+) and minus (-) symbols to browse the list of SmartTerms. To add a SmartTerm to your search, select its check box and click the right arrow button. To delete a term you have added, click the left arrow button.
3. Add additional SmartTerms or type a Terms and Connectors query in the *Search* text box, if desired.
4. Click **Search Westlaw**.

The screenshot displays the ALLNEWS search interface. At the top, the 'Search' section includes 'Selected Databases' (All News (ALLNEWS)) and navigation links for 'Change Database(s)', 'Notices', and 'Tips'. Below this is the 'Terms and Connectors' section with tabs for 'Natural Language' and 'Template'. A search input field is present, along with a 'Search Westlaw' button and several utility links: 'Thesaurus', 'Term Frequency', 'Case-sensitive Searching', 'Limit ALLNEWS', and 'Word Count Search'. There are also dropdowns for 'Recent Searches & Locates', 'Dates' (set to 'Last 3 Years'), and 'Fields' (set to 'Select an Option'). Two checkboxes are visible: 'Search only the headlines and lead paragraphs' and 'Identify duplicate documents'. The 'Limit Your Search using SmartTerms' section is expanded, showing tabs for 'Industry', 'Company', 'Subject', and 'Location'. The 'Subject' tab is active, displaying a search for 'recession' with a 'Scan' button. Below the search input, a table titled 'Smart Terms - Subject' shows a list of terms with checkboxes. The 'Recession' term is checked and highlighted with an orange box. To the right of the table, there are two arrow buttons: a right-pointing arrow (>>) and a left-pointing arrow (<<), both of which are also highlighted with orange boxes.

Figure 8. ALLNEWS Search page

You can also search using more than one category of SmartTerms. For example, to retrieve articles from the *New York Times* relating to legal issues and UnitedHealth Group (ticker symbol: UNH), access the New York Times database (NYT) and follow these steps:

1. Under *Limit Your Search using SmartTerms*, click **Company** and then select **Ticker** next to *Search by*.
2. Type **unh** in the text box and click **Scan**.
3. Select the check box next to *UnitedHealth Group Inc* and click the right arrow button to add the term to your search.
4. Click **Subject**. Choose **Begins With** from the drop-down list, type **legal** in the text box, and click **Scan**.
5. Select the check box next to *Legal* and click the right arrow button to add the term to your search.
6. Click **Search Westlaw**.

When you add SmartTerms to your search using the Limit Your Search Using SmartTerms feature, the terms you select will not appear in the *Search* text box. However, your search will retrieve documents with index references matching the SmartTerms you selected.

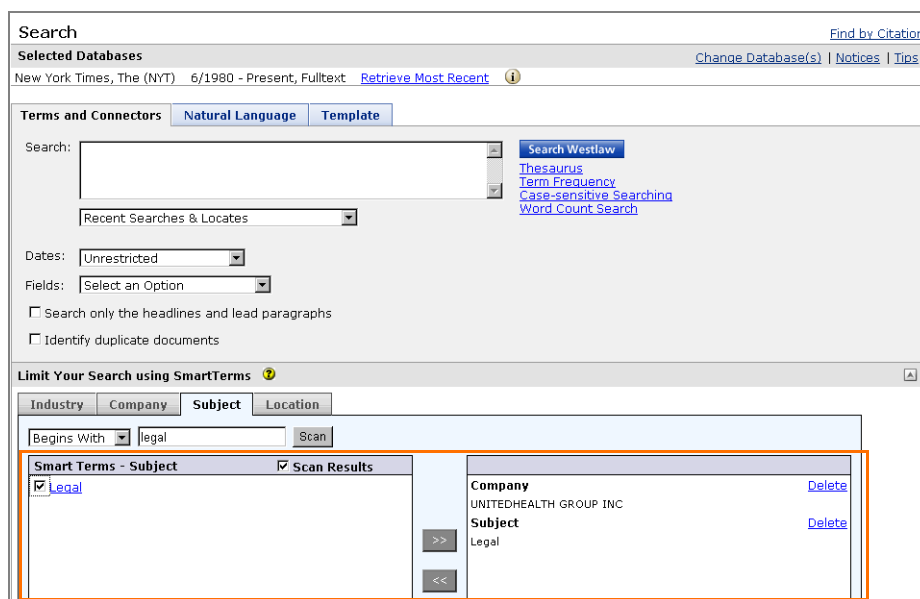

Figure 9. Adding multiple SmartTerms to a search in the NYT database

USING SMARTTERMS IN YOUR TERMS AND CONNECTORS QUERIES

As an alternative to using the Limit Your Search Using SmartTerms feature, you can type a Terms and Connectors query that includes SmartTerms. Simply type an index field abbreviation (e.g., type **ind** for the industry field) followed by the SmartTerm or West index code enclosed in parentheses (e.g., **ind(1ba20)**). You can add additional terms to your query (e.g., **down-load! & ns(1co88)**) to focus your search.

You can use either the SmartTerm itself (e.g., *Telecom*) or the corresponding West index code (e.g., *ITE27*) when searching NewsRoom databases on Westlaw. The West index code is more precise, however; the SmartTerm will retrieve any NewsRoom document that contains that term in the index fields. For example, the term *Telecom* retrieves documents containing not only *Telecom*, but also *Telecom Business Services*, *Telecom Consumer Equipment*, *Telecom Licensing*, and so on. On the other hand, the West index code for *Telecom*—*ITE27*—retrieves only those documents containing the index code *ITE27*.

You can formulate a more precise query when you use SmartTerms in combination. For example, to retrieve news stories about the outsourcing of jobs (news-subject code 1LA12) in software application development (industry code 1AP78) to India (geographic code 1IN24), access ALLNEWS and type

ns(1la12) & ind(1ap78) & geo(1in24)

Printing and Delivering NewsRoom Documents

Click a print or delivery icon in the upper-right corner of a retrieved document or result list to print, e-mail, download, or fax the document or result list or save it on Westlaw.

For added convenience, SmartTerms and West index codes can be included or hidden in news content when you are printing or delivering NewsRoom documents. To select a default setting for index term printing, click **Preferences** at the top of any page. Then click **Print and Download** in the left frame and select or clear the check box next to *Include Index Terms* to always include or exclude index terms.

4 Using WestClip

Use the WestClip clipping service to monitor news sources on Westlaw and stay up-to-date on developments that could affect your clients. WestClip will run your Terms and Connectors queries on a regular basis and deliver the results to you automatically. You can also add SmartTerms to help you define your issue and retrieve accurate and focused WestClip results.

Access WestClip in one of two ways:

- Click **Alert Center** at the top of any page to display the Alert Center Directory and then click **Create** in the *WestClip* section.
- Click **Add Search to WestClip** at the top of a result list, or while viewing a displayed document, choose **Add Search to WestClip** from the *Result Options* drop-down list on the Result List tab.

After you access WestClip, the WestClip: Create Entry page is displayed (Figure 10).

Figure 10. WestClip: Create Entry page

To create a WestClip entry, follow these steps:

1. Type a name for the entry (maximum of 40 characters) in the *Name of clip* text box, if desired.
2. The client identifier for the current research session is displayed in the *Client ID* text box. Type a new client identifier to assign this entry to another client.

3. Specify a database in which you want your search to be run by typing the database identifier in the *Database(s)* text box. If you accessed WestClip from a search result, the database identifier is entered for you.
4. Type a Terms and Connectors query in the *Query* text box. If you accessed WestClip from a search result, the query is entered for you.
5. To use the SmartTerms feature, click **Limit Your News Search Using SmartTerms**.
6. Click **Edit** next to *Delivery Settings* to display the WestClip: Edit Delivery Settings page. Change your delivery settings, such as the frequency, destination, and result format. When you are finished making changes, click **Save** to save the delivery settings and return to the WestClip: Create Entry page.
7. When you are finished setting up your entry, click **Save**.

5 Sources of News Information

Westlaw includes a comprehensive collection of business and news databases that provide you with current, crucial financial information; profiles of public and private companies in the United States and throughout the world; industry-specific news and information; and international news.

Financial Information

Financial information on Westlaw can help you research potential corporate clients and competitors and track developments affecting your business.

THOMSON FINANCIAL REPORTS

Thomson Financial reports provide insight into business and financial operations of public companies and some private companies. You can access Thomson Financial reports using the following databases:

The **Mergers and Acquisitions–Deal Information** database (M&A-DEAL) includes descriptive data on target and acquirer companies and terms of the transaction, including data on approximately 182,000 U.S. mergers and acquisitions from 1977 to present and 292,000 international mergers and acquisitions from 1985 to present. Both public and private transactions are covered.

The **Poison Pill Reports** database (POISONPILL) provides information on all poison pill shareholder rights plans in the United States and Canada that have been adopted since the invention of this defensive tactic and amendments to those plans. The information includes flip-in and other trigger thresholds, trigger exceptions, exercise price to market price comparisons, pill status, and financial and legal advisers.

The **Extel Card Company Reports** database (EXTELCARD) provides data on approximately 15,000 global equities in more than 60 developed and emerging countries and 40 industries. Coverage includes current data and up to 15 years of historical data.

The **Worldscope Company Reports** database (WORLDSCOPE) offers standardized financial statement data, calculated ratios, monthly market price data, per share data, security and market data, product and geographic segment data, and textual profile data on approximately 32,000 active public companies worldwide.

INVESTEXT PDF ANALYST REPORTS

The **Investext PDF** database (INVESTEXT-PDF) offers full-text Investext research reports written by investment specialists from leading brokerage houses, investment banks, and financial research firms worldwide, covering more than 60,000 U.S. and international companies and all industries. Coverage begins with January 1997.

EXPERIAN SMART BUSINESS REPORTS

The **Experian Smart Business Reports** database (EXPERIAN-REPORTS) provides business reports on approximately 18 million U.S. businesses. There are four kinds of reports: the Experian Limited Report, which contains key facts, corporate registration, credit summary, banking/insurance/leasing information, payment summary, and collections summary; the Experian CreditScore Report, which contains the same information in the Limited Report, along with information on judgments, tax liens, bankruptcies, credit ranking score, and collections detail; the Experian Profile Report, which contains the same information in the CreditScore Report, along with payment detail, inquiries, and Uniform Commercial Code (UCC) summary; and the Experian ProfilePlus Report, which contains all of the above information, along with UCC detail. All reports are provided in PDF.

LEGAL DUE DILIGENCE REPORTS

The **Legal Due Diligence Reports** database (GSI-DDR) provides professionally formatted reports that compile key corporate, financial, and management information on all U.S. public companies. Reports may include a company overview, financial overview, and information on officers and directors, commercial transactions, SEC compliance, and litigation and risk factors.

The **Legal Due Diligence Reports: Public and Private Companies** database (GSI-DDR-ALL) provides professionally formatted reports compiling key corporate, financial, management, and other information on all U.S. public companies and the top U.S. private companies based on total sales. Reports may include a company overview; financials; and information on officers and directors, commercial transactions, litigation and risk factors, SEC compliance, and advisory relationships.

The **Private Company Legal Due Diligence Reports** database (GSI-DDR-PRIV) provides professionally formatted reports compiling key corporate, financial, management, and other information on the top U.S. private companies based on total sales. Reports may include a company overview; financials; and information on officers and directors, commercial transactions, litigation and risk factors, and advisory relationships.

EDGAR FILINGS

The **EDGAR-SEC Filings** database (EDGAR) includes annual reports, proxy statements, 10-K and 10-Q reports, and other documents filed with the SEC via the Electronic Data Gathering, Analysis, and Retrieval (EDGAR) system. Full-text EDGAR filings are available beginning with April 1993; records of other filings are available beginning with 1968.

Company Information

Westlaw databases provides company profile information for public and private companies in the United States and throughout the world.

COMPANY PROFILES

The **Company Profiles** database (CO-PROFILE) compiles information from newspapers, trade publications, industry newsletters, analyst reports, and other current news sources and presents the information about a company in a single, easy-to-read report. Comprehensive profiles are available for more than 420,000 public and private companies throughout the world.

HOOVER'S COMPANY INFORMATION

The **Hoover's Company Capsules** database (HOOVCC) includes company capsules from Hoover's, Inc. that provide a general company overview, key people, headquarters location, top competitors, and key financial information for more than 44,000 public and private companies from the United States and other countries.

The **Hoover's Company Profiles** database (HOOVCP) includes company profiles from Hoover's, Inc., providing financial and operational information on more the 44,000 public and private companies. A typical profile includes a company overview and history, officers, headquarters address, subsidiaries and their locations, lines of business, competitors, and financial information.

D&B BUSINESS ABSTRACTS AND BUSINESS INFORMATION REPORTS

The **D&B Business Records Plus (All)** database (DUNBR) provides information on the history, day-to-day operations, finances, and corporate affiliations of more than 120 million companies throughout the world. This database offers a variety of business reports, including a brief overview (Business Abstract); a description of the company's history and operations (Business Information Report); and an analytical review of the company's history, operations, and financial standing (Comprehensive Report).

Information from individual states is found in databases with the identifier DUNBR-XX, where XX is a state's two-letter postal abbreviation.

Industry News

Westlaw industry news databases provide information and news affecting 32 industries.

Database Name	Identifier	Database Name	Identifier

International News

You can use news databases on Westlaw to keep abreast of issues and events worldwide. Westlaw offers region-specific news databases as well as single-source databases from the world's most respected news providers. You can also use the International News database (INTNEWS), a combination database that provides full-text English language articles and English-language abstracts of articles from newspapers, magazines, trade journals, newsletters, and news services, covering every region in the world.

REGION-SPECIFIC DATABASES

These databases include documents from a variety of sources, including newspapers, magazines, journals, newsletters, radio and television transcripts, and wires.

- Africa News (AFRNEWS)
- Australia News (AUSTRALIANEWS)
- Canada News (CANADANEWS)
- European and CIS News (EURONEWS)
- Far East News (FARNEWS)
- Japan News (JAPANEWS)
- Latin America, West Indies, and Caribbean News (LATNEWS)
- Middle East News (MIDNEWS)
- United Kingdom News (UKNEWS)

SINGLE-SOURCE DATABASES

The following are some of the most popular international news databases from trusted international news sources:

- AP Worldstream (APWORLD)
- Economist (ECONOMIST)
- Independent (United Kingdom) (INDPNDT)
- International Economy (INTLECON)
- International Herald Tribune (INTLHT)
- Mondaq (MONDAQ)
- M2 Presswire (M2PW)
- National Post Business (NATLPOSTBUS)
- Newsweek International (NEWKINTL)
- Times (U.K.) (TIMESUK)
- World News Connection (WRLDNWSC)

Appendix: Industry, News-Subject, and Geographic SmartTerms

Industry SmartTerms

Industry SmartTerms relate to a particular industry (e.g., Automobile Sound Systems or Insurance Brokerage), product (e.g., Fruit Juice or Luxury Items) or market sector (e.g., Agriculture or Entertainment). To use an industry-specific SmartTerm in your query, type **ind** followed by the SmartTerm or the West index code in parentheses, e.g., **ind("financial services")** or **ind(1fi37)**.

News-Subject-SmartTerms

News-subject SmartTerms include events (e.g., Initial Public Offerings (IPOs) or Natural Disasters), activities (e.g., Sales and Marketing or Corporate Legal Management), and issues (e.g., Interest Rates or Management Tools and Methods) that affect the marketplace. To use a news-subject SmartTerm in your query, type **ns** followed by the SmartTerm or the West index code in parentheses, e.g., **ns("economic indicators")** or **ns(1ec19)**.

Geographic SmartTerms

Geographic SmartTerms help you search by region (e.g., Indian Subcontinent or Latin America), country (e.g., Czech Republic or Turkmenistan), or state (e.g., Colorado or South Carolina). To use a geographic SmartTerm in your query, type **geo** followed by the SmartTerm or the West index code in parentheses, e.g., **geo(usa)** or **geo(1us73)**.
