Four ways to find what you need fast

Despite the depth and breadth of coverage, Westlaw makes it easy to locate the right ALR article.

- Type in your legal issue in plain English and the powerful Westlaw research engine delivers the right article instantly
- You can also zero in on the right content via ResultsPlus®, an exclusive Westlaw time-saver that suggests relevant ALR articles based on your original search terms
- The ALR Digest is synched to the West Key Number System, so if you have a Key Number®, you can find the companion ALR article – and vice versa
- Scan the detailed Table of Contents with thoroughly indexed tables for cross-referencing

Written by capable attorneys

Every article is a complete research brief that summarizes all caselaw relevant to a specific

legal point. Articles analyze distinctions among cases to give an objective analysis of both sides of an issue. Plus, the authors add such helpful features as prefatory statements, detailed outlines, practice pointers and cautions.

And connect to all related content – confident you've missed nothing

Because Westlaw integrates all its content, a single ALR article links you to other content that discusses your specific point of law, such as:

- Cases, statutes, rules and regulations
- KeyCite® references so you can see the status of the cited law – is it still good?
- Other on-point analysis, including references to Am Jur, digests, treatises, law reviews and more
- Such legal documents as briefs, pleadings and motions, that were submitted in cited cases

With ALR on Westlaw, you can literally start anywhere in the research stream to line up every on-point resource. Fast, in-depth and thorough. And now, available online exclusively on Westlaw.
